

# Hawker Beechcraft Services introduces 90x Package Gross Weight Increase with Winglets Beechcraft King Air C90/A/B/GT/GTi/E90

Increases max takeoff weight for increased payload and greater flight range. Winglets provide increased rate to climb, fly faster on less fuel.

## Advantages

### Gross Weight Increase STC

- Carry more fuel/greater range
- Carry more cabin payload
- Accurate AFM performance charts for safely operating at new weights
- Increase aircraft resale value

### BLR Winglet STC

- Increases wing aspect ratio to reduce induced drag
- Fly faster on less fuel
- Improves flight handling qualities during slow flight and at higher flight levels

## Gross Weight Increase Performance Chart

	C90/A (LJ-577 – 1137)	C90A/B C90GT C90GTi	E90
Increase Max Ramp Weight	9,705 to <b>10,545</b>	10,160 to <b>10,545</b>	10,160 to <b>10,560</b>
Increase max Takeoff Weight	9,650 to <b>10,485</b>	10,100 to <b>10,485</b>	10,100 to <b>10,500</b>
Increase Max landing Weight	9,168 to <b>9,700</b>	9,600 to <b>9,700</b>	No Change
Max Zero Fuel Weight	<b>9,378</b>	<b>9,378</b>	<b>9,378</b>
Payload Increase	<b>835</b>	<b>385</b>	<b>400</b>
