

Aircell® SwiftBroadband

King Air / Premier / Beechjet / Hawker

Overview

- Aircell SwiftBroadband enables passengers and crew to use their own 802.11b/g-equipped Wi-Fi data devices — laptops, PDAs, BlackBerrys® and portable gaming systems — in flight, Aircell broadband is, quite simply, revolutionary. Available only with Aircell Axxess equipment, Aircell broadband will deliver a reliable, robust Internet connection to your aircraft.
- Operating in Aircell Axxess' wireless environment, Aircell broadband allows you to check e-mail, surf the Web, tap into an office network and stay current on the latest news, all at DSL broadband speed.
- Plan ahead and schedule your upgrade to Aircell Axxess today at any factory-owned Hawker Beechcraft Services location.
