

# King Air Heated Seats

**Hawker Beechcraft**

- Manufactured using only aircraft grade materials
- Built-in safety features, including auto shut off occurring one hour after the system is turned on as well as a self-diagnostics and redundant temperature monitoring
- Designed to pass ten-year life-cycle jounce and squirm test, sliding entry test, and 150 lb knee compression test
- Designed, manufactured, tested and approved per RTCA-DO-160 requirements for installation and operation aboard aircraft
- Efficient power consumption, using only 2.3 Amps @ 28VDC per set
- Does not alter structure or aesthetics of the seat

# King Air Heated Seats
